

HYDRAULIK-SYSTEME • AUFZUGS-KOMPONENTEN

Electronics technician for our aggregate test bench

We the company ALGI Alfred Giehl GmbH & Co. KG have been the leading manufacturer of hydraulic elevator components for decades. Modern, energy-saving drives, robust support frames and cabins all developed and produced in our company. From a simple passenger elevator to a XXL freight elevator we supply our products to all well-known elevator manufacturers at home and abroad. The requirements for our components are individual and versatile. In addition to a wide range of standard products, we develop individual, optimized solutions for our customers.

Your responsibilities:

- Commissioning of our hydraulic components as well as the appropriate power electronics / frequency converter
- Test assembly of our hydraulic power units with frequency converter according to customer specifications
- Assembly of special components as well as the manufacture of small controls

Your profile:

- Qualified vocational training in the metal and electrical industry with a degree as an electronics technician
- Several years of experience, good understanding in dealing with measurement and control technology on hydraulic systems
- Experience in the field of control engineering
- German fluent in spoken and written
- English skills are beneficial
- Confident handling of office programs
- Independent, self-reliant way of working
- Independent, self-reliant way of working
- Willingness to communicate and cooperate
- Car driving license

We provide:

- A responsible and challenging position in a successful company with development opportunities with performance-related pay
- Cooperation with an experienced and motivated team
- Intensive familiarization with our products
- Varied range of tasks
- Offerings of training courses/continuing education
