

## Technical consultant for elevator technology in office work

We the company ALGI Alfred Giehl GmbH & Co. KG have been the leading manufacturer of hydraulic elevator components for decades. Modern, energy-saving drives, robust support frames and cabins all developed and produced in our company. From a simple passenger elevator to a XXL freight elevator we supply our products to all well-known elevator manufacturers at home and abroad. The requirements for our components are individual and versatile. In addition to a wide range of standard products, we develop individual, optimized solutions for our customers.

### Your responsibilities:

- Determination of demand with our national and international customers (elevator companies, planners and operators)
- Expert advice for our customers
- Quotation preparation and order processing from hydraulic drives to complete elevator systems
- Preparation of order-related planning documents
- Interface to all relevant, sales-related departments
- Intensive market and competition monitoring

### Your profile:

- Craft or technical training and further education or studies (e.g. industrial engineer)
- Affinity for sales and enjoyment of discussions / presentations
- Independent, structured and efficient way of working
- Open, communicative appearance
- Ideally experience in the field of elevator technology
- German and English spoken and written
- Sound IT knowledge (ERP, Office)

### We provide:

- A permanent job
- A comprehensive familiarization with our products
- An interesting, responsible task in a committed team
- A pleasant working atmosphere and open, cooperative interaction
- Free space and development opportunities
- Performance-based compensation and flexible working hours

Have we aroused your interest? We look forward to receiving your application documents.
